Trace levels of some essential trace elements in urine of pregnant and non-pregnant women. Urine samples from 46 pregnant women and 41 non-pregnant women were analyzed by electrothermal atomic absorption spectrometry for the determination of zinc, copper, manganese, and chromium in the trace element area. The aim of the study was to find out whether the pattern of trace element excretion in urine is different between the pregnant and non-pregnant women. The concentrations of the above-mentioned trace elements in urine of the non-pregnant women were compared with values found in the literature for the concentrations of these trace elements in urine of non-pregnant and pregnant women in earlier studies. VENTURA — Most of the people who work for the Ventura County Fire Department are proud of the institution, not only for the daily selfless service they give to the community, but also the service they give to each other. But there are a few who have tarnished the department's reputation. One of the most publicized employees within the Fire Department was former officer Jason Donsky, fired in 2009 after he allegedly drove his personal vehicle into a van full of children, killing one girl and injuring three others. Donsky, who had just completed four years as an officer at the department, was given a \$100,000 settlement from the city of Ventura. Ventura has been looking to beef up its police force in recent years, and it recently has hired the help of the department that has been plagued by recent scandals. Other former employees include Jason Masters, who was fired in February 2011 after he had a fight with his wife, pulled out a gun and shot it twice at the ceiling while the couple's young son and his wife were sleeping in
