• Supports Windows XP and Windows 2000 servers • Compatible with Microsoft Outlook 2000 • OLfolders Server Installation • Cross-platform OLfolders Server with .NET 2.0 • Search for task in Outlook • Export tasks to Outlook • Adding and synchronizing new folders • Efficiently indexing Outlook database files • Refreshing task in Outlook • Synchronizing task with OLfolders Server • Configuring OLfoldersServer • Outlook shortcuts in the Windows tray AgilePC1.0.0.1 AgilePC1.0.0.1 Description: AgilePC allows you to enjoy your PC how it should be enjoyed; instead of having your PC performing at 60% for over a year, you can enjoy it at 100%! AgilePC is a PC-optimization software designed to add 20%-100% more speed, memory, and performance to your PC. AgilePC utilizes your PC's hard drive as a low-cost memory upgrade. Because it is a memory-intensive system, hard drives operate at speeds up to 200% faster than memory! AgilePC is also a complete hard drive cleaner, which effectively eliminates the need to purchase a separate hard drive cleaning software. AgilePC begins by first scanning the hard drive for bad sectors. If any bad sectors are found, AgilePC automatically deletes them, then uses an advanced sector defragmentation algorithm to reallocate the data in the sectors to maximize data-reading and-writing speed. AgilePC will even reallocate the data from one hard drive to another, if the first drive is replaced with a new one. RAD-RAD-RAD.COM 3.0 RAD-RAD-RAD.COM is a set of intuitive applications that make your work easier and enhance the capabilities of your computer. Each app is specialized for one task, so you can use them all without switching between them. *Speed Control - Turn your computer on and off in an easy manner. *Disk Cleaner - Remove temporary files, old log files, and more. *Drive/Port/Device Finders - Find information about the location of hard drives and controllers. *Backup - Easily backup or restore entire hard drives. *Performance Booster - Boost the performance of your PC *Task Scheduler - Automatically perform system tasks at your convenience *Monitor - View or change the performance of your
