PURE4DISTANCE Description: PURE4DISTANCE is a distance measuring software for PC with a great user interface. The program contains two measuring modes. The first one is a selection mode, where the size of objects is determined on the basis of measuring points with optical scales and clicks of the mouse. The second one is an auto-measuring mode, where the software looks for the most suitable measuring points automatically and measures distances for all objects that it finds. The program is very fast and gives accurate results. A unique feature of the program is the possibility of marking the measuring points on the screen. Features: - Automatic recording of the points and measuring the distance - Determining the size of objects with points on the basis of the program's autofocus - Combining of measurement data with a database (Excel, Access,...) - Printing of the results and exporting them to text files - The first version of the program has an additional mode - the distance conversion for GPS coordinates - The program provides a number of useful functions - Running the program from CD - Fast program with a clear interface - Optimized for Microsoft Windows 2000/XP/Vista/Win 7 - English, Russian, French, German, Spanish, Portuguese

The EXPRESSION EXPRESSER 3.0 Description: The EXPRESSION EXPRESSER 3.0 is a software utility that you can use to create and edit your own templates. The templates are able to help you to make regular formulas (MATHs) by using a large number of different mathematical functions. These functions can be used in almost any situation and to solve almost any problem. They are so helpful 77a5ca646e

Expression Solver Product Key

- Cut back on the amount of time spent tackling complex mathematical calculations - Expand the tool set of your calculator to include a variety of mathematical functions - Handle operations with a range of angle systems - Switch between various angle systems with ease - Perform mathematical operations with great precision and accuracy - Solve equations and inequalities in all degrees of accuracy - Compute trigonometric functions - Calculate the square root of complex numbers - Handle logarithms - Perform calculations involving complex numbers Powerful Calculators/Expressions Solver is a mathematical calculator that helps you solve complex calculations with ease, whether you are performing simple or advanced operations. It contains a variety of mathematical functions for calculations such as logarithms, square roots, complex numbers, trigonometric functions and others. It can be used for solving linear and quadratic equations. Powerful Calculators/Expressions Solver is easy to use and does not require any installation. Powerful Calculators/Expressions Solver has a friendly interface and it can be operated on any desktop computer. It is a simple application with which complex calculations can be performed very easily. 3.09 MB Expression Solver for Excel 2 Expression Solver for Excel 2 is a Microsoft Excel add-in that can easily integrate into your existing spreadsheet model to perform powerful calculations. With this software, you can easily calculate square roots, cube roots, common logarithms, square and cube roots of complex numbers, perform unit conversions, and much more. As its name implies, this software supports Microsoft Excel 2003 and later versions. It can easily perform calculations in the Office 2003 and Office 2007 file formats. If you have Microsoft Excel 2007, you can even perform calculations with fractions. 3.34 MB Mephedrone (methcathinone) Mephedrone (methcathinone) is a synthetic cathinone. Mephedrone is a stimulant drug of the cathinone class. The effects of mephedrone are similar to those of cathinone and cocaine. Mephedrone acts as a potent dopamine reuptake inhibitor, which means it makes dopamine remain in the synapse longer, and have a greater stimulating effect on the brain. Its actions are similar to those of methylphenidate and mirtazapine. Mephedrone is a close structural analog of cocaine, with the meth group being removed from the parent

Expression Solver is a software utility designed to greatly improve the way you perform mathematical calculations, by allowing you to efficiently make use of a variety of included expressions and functions. Whether you just want to calculate basic additions and multiplications, or you need to use slightly more complex trigonometric functions, such as sine or cosine, they are all at your disposal. Finally you have a very useful and powerful calculator! Calculate almost any kind of mathematical expression Expression Solver is a software utility designed to greatly improve the way you perform mathematical calculations, by allowing you to efficiently make use of a variety of included expressions and functions. Whether you just want to calculate basic additions and multiplications, or you need to use slightly more complex trigonometric functions, such as sine or cosine, they are all at your disposal. Furthermore, you can also tackle operations involving logarithms, as well as quickly employ the services of the well-known irrational numbers, pi and e. These are provided with a precision of 14 digits, which is more than plenty for any sensible calculation you might need them for. Switch between various angle systems Depending on your field of expertise, you might require your results to be expressed in a different angle system. The utility allows you to easily switch between degrees, radians and grads, all of which come with their respective uses and applications. Each of them, however, require a correct input in order to display accurate results, so you should pay attention when you switch them. As far as limitations go, the program can handle calculations within a pretty extensive range, both for integer and floating point operations. After a certain threshold, the results may start to be rounded up and not be entirely precise, although that only happens for very large or very small numbers. For regular, day-to-day use, though, the application is able to perform without any troublesome limitations. In conclusion The simple and intuitive interface of Expression Solver make it a very attractive application, especially since it delivers many useful functions that can be directly integrated into your calculations, without the need to manually write them every time.
