If the new printer is connected to the same network as the computer, the search parameters in this dialog box are set automatically. **\*\*NOTE\*\***: To use the product license key, make sure the printer is turned on. You can press the Power button on the back of the printer or on the printer management panel. To turn the printer on, press and hold the Power button for 4 seconds. Select the "Locate a printer on network" option, and enter the hostname or IP address of your computer. Press OK and then a dialog box displays the results found. Choose a printer and click "Add". After the new printer is installed, select it and click the "Show printer properties" button to display its properties. You can set the printer properties from here.

**\*\*NOTE\*\***: For example, you can set the printer connection type, the text/graphics printing quality, and color options, as shown below.  If the printer is set to a wireless connection, you can choose the wireless network from the "Connect to a wireless network" section. Press the "Edit" button on the right side of the window. Enter the printer's license key and then press "OK". If the printer is connected to a local network and you don't want it to be shared, you can select "Connect to a non-shared printer" from the "Local connection" section. If the printer's USB port is not connected to the computer and you want to connect it via Wi-Fi, choose "Connect to a wireless network" from the "USB

connection" section. In the same section, set your preferred connection mode, and then set the protocol, authentication method and encryption key for the connection. If your local network uses a Microsoft Active Directory domain, the network settings will be set automatically by Autodesk. However, if your local network is not configured to use Active Directory, you can enter the printer's Active Directory domain name and primary domain controller. The default Wi-Fi password is saved automatically, so you don't have to enter the Wi-Fi password again when you connect the printer. The default username is saved automatically, so you don't have to enter the username again when you connect the printer. The user's name is displayed in the "Username" field and

#### **What's New In AutoCAD?**

**Data Management in your CAD files:** Manage and organize file data from your drawings using a powerful new toolset that can help you organize, add metadata to your data, and apply time stamps. (video: 9:07 min.) **Plus new features to help with your design workflow:** **Sharing and collaborating:** Share drawing content with others using PowerPoint, Keynote, and other presentation programs. Keep working on your design while someone else works on the same content. You can also use embedded presentations to insert and view your data into an existing presentation. **External Data Connections:** Design against any database through External Data Connections
