Q: How to get SVN property in gulp-concat or gulp-vinyl? I would like to output the SVN property in all the files, similar to what I do to get a timestamp. I tried adding the following to the gulp-concat or gulp-vinyl task, but it did not work. concat(files, { filter: function(file) { file.svn = moment(file.timestamp).fromNow(); } }); Is this possible? Thanks A: Since you're concatenating the files, you can't access them within the filter callback, but you can access the attributes you're interested in within the dest object. // configure paths and what type of file is being generated var files = glob.sync(paths); var umd = require('gulp-umd'); var concat = require('gulp-concat'); var gulp = require('gulp'); // apply the settings gulp.task('default', function () { gulp.src('js/app.js') .pipe(umd({name: 'app-min'})) .pipe(concat('app.min.js')) .pipe(gulp.dest('dist/js/app')) .pipe(replace('@timestamp/', function (matched, p1) { return moment(p1).fromNow(); })); }); // filter the files and replace the timestamp gulp.task('default', function () { gulp.src('js/*.js') .pipe(umd({name: 'app-min'})) .pipe(concat('app.min.js')) .pipe(gulp.dest('dist/js/app')) .pipe(replace('@timestamp/', function (matched, p1) { return moment(p1).fromNow(); })); }); // ...I have found much of 3da54e8ca3
