Adobe Photoshop Product Key Lightroom: The digital photo library Lightroom is the premier all-in-one photo editing and organizing tool. Not only can you process your photo library in ways that other programs can't, but it also organizes your digital files for easy access. Not only is it an excellent tool for photographers, but it can be used to manage the images for everyday projects. You may even be able to use Lightroom as a cataloging tool — a document that lists all the photographs you've taken. Lightroom is available for Mac and PC computers.

We've also created a free Photoshop Full Crack Elements infographic to help you understand the ins and outs of the software. Read our explainer on the advantages and disadvantages of Photoshop Elements. How to edit or save an image in Elements First, simply

---

browse the different tools or panels in the Photoshop Elements interface. When you find the area of the image you want to work on, drag the slider, which will move that area to the left or right and crop out the unwanted stuff. Left-click and drag over an area you want to retain to make it a copy. When you're happy with what you've done, right-click and select save as, and rename it as you like. You can also upload your image to a website, print, share to social media or other methods.

### How to use photoshop elements 1. Previewing

Once you have opened your image, you will want to see if you can preview the changes you are making. You can use the Zoom tool to zoom in or out. To hide all the layers, or to make sure that it's only visible the layer you want to work on, press Ctrl+T. You can also use Cmd+T to make it full screen. Hovering over the image will highlight areas you are pressing on. If something moves away from the center, this will be highlighted as well. You can use the Center brush and rotate the image by holding the Shift key and using the mouse to move the cursor.

Elements If you want to do more than just preview what you're doing, you can use Photoshop Elements. You can manipulate the colors, shapes, and layers, and even change the color of parts of the image. If you don't want to zoom into the image, you can use Cmd+Tab to switch over to Photoshop Elements. You can press Ctrl+Tab to go back to the main Photoshop program.

Shapes You can use one of the shapes on the left side of the tool to draw rectangles, circles, stars, lines and shapes. These are made into separate layers.

Color To change the colors, go to Edit > Fill & Stroke > Fill. You can choose the color, set the gradient or transparency, and change the color to black.

Stay Connected Fan Token Swap Planned for 7/17-7/20 at 8 AM Pacific Time We have been working hard behind the scenes making sure we are ready for the upcoming fan token swap scheduled for this July. Although there are multiple factors that go into the success of a blockchain token swap, we feel as a team we have executed our plan perfectly and that the funds provided to us by Uni4X will go to great use as we put it out there into the world in the form of what we think is a very valuable token. The upcoming July fan token swap will start on July 17th, 2017 at 8AM Pacific time, at which point you are able to swap your FAN to UltraforU. A portion of the swap fee will be used to offset the transaction costs of the swap. That is the amount of FAN that will be converted into UltraforU. We have also taken care to ensure that we have a transfer-friendly address that allows the exchange of any desired amount of UltraforU. We have published the address in the forum, in the

---

announcements, and in our whitepaper. This will be a true, peer-to-peer swap that will be conducted through an airdrop wherein the entire balance of FAN you have will be converted. We are very excited about this process for a number of reasons, but there will be further details and instructions shared with our community members who are a part of the swap. Also, a \$10,000,000 ether burn has been set aside in order to burn through the large amounts of tokens that have been traded in the past few days. This amount of tokens will be burned in blocks at which point our smart contracts will automatically generate a refund of that ether and send that to our recently-announced refund address. The original amount of ether used to burn the tokens will remain in the smart contract. Finally, it should be noted that the sending address(es) of your tokens that will be converted will be hidden from your wallet and only accessible by you in order to hide the sending addresses of the new tokens, thereby making it impossible for any party to know where they originated from. To participate in

---

the July fan token swap, if you have not already done so, you must download and install the Wallets and sign-up to our new wallet. If you haven't done so already, you will need to copy and paste the address to your wallet.
