A One Piece Film Z 1080p English SUBBED is here! Q: Filtering the most significant digits from an array I am trying to make a matrix of the row and column numbers of a table. (with the intention of applying a threshold to the numbers). Each 'cell' of this matrix should be created using one of the following rules. If the number is less than or equal to 'threshold' it should just be set to zero. Otherwise it should be the sum of the most significant digits. This means that "12345" would be represented by: 0 1 2 3 4 5 What I have at the moment is the following function: function makeMatrix(row, column, threshold) local matrix = {} for x = 0, row do table.insert(matrix, 0) end for y = 0, column do local row = y + 1 for x = 0, row do table.insert(matrix, 0) end for x = 0, row do if y == 0 then if Math.floor(threshold, 10) >= x then
