### Download

There are so many things that can go wrong! This problem becomes highly complex and it is almost impossible to find the exploit! An invalid signature is usually a weak sign of a cracked copy of the game. The 'forzahorizon2pccrack15' that you saw is a placeholder and part of the exploit. It didn't really crack or cause any damage to your pcc files or game. An 'invalid signature' means that the game is now at the log in screen and when the username and password is entered, it will pop up an alert saying "The signature on your.pcc file is damaged and the login information will be blocked. The file is definitely cracked. (A valid certificate was used on the login)". You will now need to enter a new username and password in the game and then log back in again. The game will then boot into the login screen and you can log back in with a new password. If you want to check for some time how it's done, here is the MD5 checksum for the.pcc file: forzahorizon2pccrack15\C\$\Users\AdrianK\AppData\Local\Temp\1bcd509c2e4b3ef

Каждая комбинация просто должна полностью имитировать хак, который был исправлен, так что решение никто не наметил, ничего хорошего не получится.
